CHINA NATIONAL BUILDING MATERIALS GROUP CORPORATION

Social Responsibility Report

CHINA NATIONAL BUILDING MATERIALS GROUP CORPORATION

2012 Social Responsibility Report

About this report: This report is prepared by the Greenhouse Gas Reporting Centre (CNBM) on behalf of the CNBM.

Period covered by the report: 1 January - 31 December 2012; and 2013.

Reporting frequency: Annual

Member companies covered by the report: A list of member companies is provided in the report. CNBM is the reporting entity for the Greenhouse Gas Reporting Centre (CNBM).

Referential guidelines: The report is prepared in accordance with the Greenhouse Gas Reporting Guidelines (2006) (GRI); and the Greenhouse Gas Reporting Guidelines (2006) (GRI) (26000).

Data sources: The data is sourced from the CNBM and other member companies.

Assurances: The report is assured by the Greenhouse Gas Reporting Centre (CNBM) for the period 2012.

How to get this Report: The report is available on the website: <http://www.cnbm.com.cn/EN/>

2012

**Comments from External Parties:
State-owned Assets Supervision
and Administration Commission
of the State Council:**

The Board of CNBM conscientiously discharges its duties, prudently regulates its decisions and plays an important role in determining the direction of corporate development. The operation of the Board is satisfactory, it achieves stable re-election with its organisational structure further optimised. The work done by the Board of CNBM in refining the systems, strategic leadership, risk prevention, critical decision and appraisal to managers and remuneration management is highly effective.

Sun Xingmou, Deputy Director of Supervisory Bureau of Disciplinary Committee of the State-owned Assets Supervision and Administration Commission of the State Council

While emphasizing on production and operation, CNBM has attached great importance to the construction of party's conduct as well as the work of anti-corruption and integrity advocacy. It earnestly implemented the accountability system of party's conduct and anti-corruption, further promoted the establishment of a punishment and prevention system, strengthened education, improved the "Three Important and One Crucial" decision-making system, enhanced supervision and inspection as well as performance monitoring, and reinforced the discipline inspection team building. All these measures safeguarded the stability of CNBM's reform and development.

Operating in Compliance with the Law

Implementing National Industrial Policies

Gao Yunhu, Deputy Director of the Raw Materials Division of the Ministry of Industry and Information Technology

CNBM has made great contribution to the development of the industry and the promotion of technology enhancement in the industry. CNBM is a role model for the building materials and other industries in terms of practice and experience in consolidation and restructuring, innovation and development model formation and management standardisation.

Lei Qianzhi, Honourary President of China Cement Association

The cooperation between CNBM and the Conch Group has created the integration of resources among big enterprises in the industry. This is very significant, for it would further promote the restructuring and transformation of the building materials industry.

Cai Hongbin, Dean of Guanghua School of Management, Peking University

SOE reforms have been the core of the economic reforms of our country. It is also a huge social practice which involves millions of people. The "Market-oriented Operation of Central SOEs" concept, advocated by Song Zhiping, provides us a comprehensive solution. I believe that the key concepts of "Market-oriented Operation of Central SOEs" will be integral to the theoretical construction of SOE reforms.

China Building Materials Academy

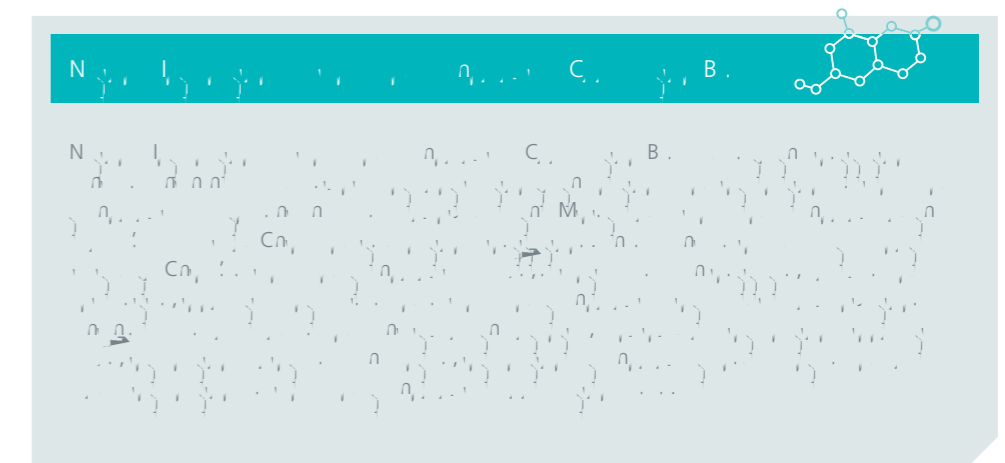

China Building Materials Academy

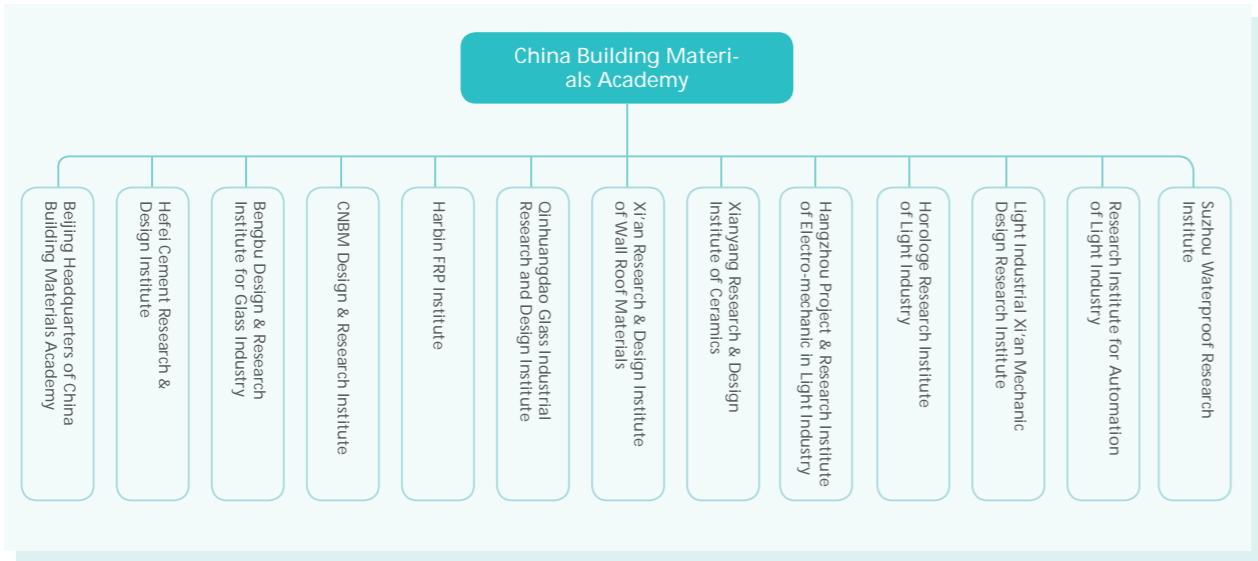

Huang Danhua, Vice Chairman of State-owned Assets Supervision and Administration Commission of the State Council

China Building Materials Academy has managed to leverage the key development opportunity and tapped fully into its resources. It has commenced the integration and opening up of technological resources, the establishment of a scientific research innovative system and mechanism, recruitment and nurturing of talents, industrialisation of scientific research achievements, development of inspection and certification, establishment of corporate culture and other aspects, which has proved to be highly effective. It has contributed to the establishment of the national economy, guided the industry transformation and upgrade and provided the advanced technology for CNBM to grow with stronger international influence.

CNBM has obtained independent complete intellectual property rights in 10,000 ton clinker production lines. The Group has well mastered the modern production techniques of NSP cement. This is a valuable asset. I hope that CNBM, with the support of national policies, will carry out technical reformation in small-and medium-sized cement companies which consume a large amount of energy and create a great deal of pollution to set an example in technological progress for China's cement industry.

External Commendation: Xu Kuangdi, Vice Chairman of the National Committee of the 10th Chinese People's Political Consultative Conference and Honorary Chairman of the Chinese Academy of Engineering

High performance fiber, as an important strategic material in the nation, is widely used in the fields of high-end technology and industry. The enterprises must pay attention to the research of high performance carbon fiber, improve the properties as well as the international competitiveness of the products.

Promoting the Industrialisation of Key Projects

External commendation: Li Xueyong, Vice Secretary of Jiangsu Provincial Party Committee and the Governor of Jiangsu Province

The restructuring of CNBM and China Building Materials Academy is a combination of the best resources, which has realised the joint development of research and industry. In addition, the scientific innovation has promoted the transformation and upgrading of enterprises.

Environmental & Energy

Emphasis on Investment in Energy Conservation and Environmental Protection

For 2012, the company has invested 1.08 billion yuan in energy conservation and environmental protection, which is 30% higher than that of 2011.

The company has completed the construction of 10 energy conservation and environmental protection projects, which have saved 100,000 tons of standard coal and 100,000 tons of water.

Improvement in Energy Efficiency

The company has achieved a 10% improvement in energy efficiency compared to 2011, with a 10% reduction in energy consumption per unit of output.

Environmental Governance and Emissions Reduction

2012, 100%

The company has achieved 100% compliance with environmental laws and regulations. The total amount of COD discharged in 2012 was 2,000 tons, a 20% reduction from 2011.

The company has achieved 100% compliance with environmental laws and regulations. The total amount of SO2 discharged in 2012 was 12,000 tons, a 30% reduction from 2011.

Noise Control

2012, 100%

The company has achieved 100% compliance with noise control standards.

The company has achieved 100% compliance with noise control standards.

64%, 2012

Adhering to Green Manufacturing

China National Building Materials Group has strictly followed the national and local government's requirements on environmental protection and green manufacturing. The Group has established a complete system of environmental management, including environmental protection objectives, responsibilities, and procedures. The Group has implemented a series of measures to reduce the impact of its production activities on the environment, such as improving energy efficiency, reducing emissions, and recycling waste. In 2012, the Group's environmental protection work achieved significant results, with a 64% reduction in energy consumption per unit of production compared to 2011.

Promoting Green Packaging

China National Building Materials Group has actively promoted green packaging to reduce the environmental impact of its products. The Group has implemented a series of measures to reduce the use of packaging materials, such as using recycled paper and reducing the size of packaging. In 2012, the Group's packaging waste recycling rate reached 90%.

Advocating Green Consumption

China National Building Materials Group has actively advocated green consumption to reduce the environmental impact of its products. The Group has implemented a series of measures to reduce the environmental impact of its products, such as using recycled paper and reducing the size of packaging. In 2012, the Group's packaging waste recycling rate reached 90%.

B

Promoting Safety Culture

Sun Huashan, vice director of State Administration of Work Safety

"As a central SOE and a pioneering enterprise in China's building materials industry, CNBM has set a good example in production safety, as it does an effective job in setting standardized safety procedures and participates in the drafting of safety standards for multiple industries like cement, glass and gypsum boards. It also propels itself to meet relevant standards and has achieved good results. CNBM helps to improve the safety standards in the building materials industry and sets a good example in the safety procedure standardization drive for China's manufacturing and trade enterprises."

Promoting Safety Management Procedures Standardisation

As a central SOE and a pioneering enterprise in China's building materials industry, CNBM has set a good example in production safety, as it does an effective job in setting standardized safety procedures and participates in the drafting of safety standards for multiple industries like cement, glass and gypsum boards. It also propels itself to meet relevant standards and has achieved good results. CNBM helps to improve the safety standards in the building materials industry and sets a good example in the safety procedure standardization drive for China's manufacturing and trade enterprises.

Zhang Dejiang, Vice Premier of the State Council

"The Central Committee of the Communist Party and the State Council put great emphasis on the work of poverty relief and development. CNBM's investment in and cooperation with Shizhu inject new impetus to the local economic development. Unlike poverty relief in the past, CNBM focuses on establishing industries and leaving real benefits through cooperation. CNBM needs to follow the law of market economy in conducting its business, developing industrial and other kinds of enterprises in Shizhu based on the local resources, the development strategy as a central enterprise and its own development strength, which could promote the development of Shizhu and the central enterprise at the same time."
